Year Of The Otter

CSUMB

Class of 2019

This filter will take a selfie image and will replace the pixels in the top right to that of an image of the CSUMB logo. I will be using the greenscreen replace technique to replace the green background Of the logo with that of the selfie. Then I will allow the user to type in their graduating year to write in the bottom right corner of the image with a gold backdrop. Now everyone at CSUMB to school pride and their graduating year.

Comic Book Filter

    This filter will take any image that you give it, and will change it to look more like a comic book drawing. First the image that is provided is turned into a line drawing. This is to add more details to some of the lines in the drawing to give contrast. Next the image has an artify function run against it giving it that comic bookesq feel to it by changing certain colors depending on where their RGP values fall. Finally, a border is added to the picture to make it look like it is part of a comic strip in a book.
